SUMMARY

Full-Stack Developer with 6+ months of experience building enterprise SaaS applications using React.js, TypeScript, Node.js, Express.js, PostgreSQL, and MongoDB. Experienced in developing scalable REST APIs, RBAC, multi-tenant architectures, and responsive web applications. Contributed to POS, Inventory, Fulfillment, Restaurant POS, School Management System, and AI-powered applications.

PROFESSIONAL EXPERIENCE

Software Developer Intern

05/2024 - Present | Bangalore

Maskan Technologies

- Developed enterprise SaaS applications including Product Information Management (PIM), Inventory Management, Fulfillment, School Management System, and Restaurant Management Platform using React.js, TypeScript, Node.js, Express.js, PostgreSQL, and MongoDB.
- Built responsive web and mobile interfaces, reusable React components, and improved UI/UX across multiple enterprise modules using React.js, Tailwind CSS, Bootstrap, and Vite.
- Developed secure RESTful APIs, JWT Authentication, Role-Based Access Control (RBAC), Tenant Management, and scalable multi-tenant architecture while integrating PIM, Inventory, and Fulfillment systems.
- Contributed to client projects by implementing new features, resolving production issues, deploying applications using Vercel and Render, and collaborating through Git, GitHub, Postman, and Agile methodologies.

EDUCATION

Bachelor of Technology (Computer Science Engineering)

2025 | CGPA: 8.6/10

CMR University, Bangalore

SKILLS

- Languages: JavaScript, TypeScript, Python, SQL, HTML5, CSS3, Tailwind CSS, Bootstrap, React Router, Axios, Vite
- Frameworks: React.js, Node.js, Express.js, REST APIs, JWT, RBAC
- Databases: PostgreSQL, MongoDB, MySQL
- Tools: Git, GitHub, Docker, Postman, npm, VS Code | Deployments: Vercel, Render

CERTIFICATES

- MERN Stack Development - Innovate Digital Academy
- Google Data Analytics Professional Certificate - Coursera

PROJECTS

AI Job Platform

- Developed an AI-powered job platform enabling intelligent resume analysis, personalized job matching, secure authentication, and role-based dashboards.
- Built scalable REST APIs and responsive user interfaces using React.js, TypeScript, Node.js, PostgreSQL, and deployed applications using Vercel and Render.

Product Information Management (PIM), Inventory & Fulfillment Platform

- Developed enterprise SaaS modules including Product Catalog, Product Families, Variants, Assets, Inventory, Warehouse, Vendors, Purchase Orders, and SKU Management.
- Implemented RBAC, Tenant Management, backend APIs, and integrated PIM, Inventory, and Fulfillment systems using secure REST APIs.
